उम्मीदवारों को इस हाशिए में नहीं लिखना चाहिए
Candidates must not write on this margin

'Buddhism' grew as a separate fold from Hinduism to address the rigidities & dysfunctions of Hinduism as- castism.

Cause of decline of Buddhism

1) Funding - Buddhism initially flourished due to patronage & funding by Kings such as Ashoka. But later on other Brahmin rulers such as Shunga dynasty didn't patronise it.

- Shunga, Kanva, Satavahana did n't fund Buddhism rather funded to revive Brahmanism.

2) - No more funding to create institutions as- Pal funded Nalanda university construction & monasteries

उम्मीदवारों को इस हाशिए में नहीं लिखना चाहिए
Candidates must not write on this margin

2) Followers -

1) Buddhism, initially had huge followers because of its liberal & open ideology of embracing all.

2) Later on, reforms in Brahmanism led to rise of Bhakti movement which propagated same ideas and adopted a inclusive approach -

3) This led to decline in followers of Buddhism & more followers of Brahmanism as - Alvars, Nayanars Saints had huge followers

4) Ideology -

1) Buddhism ideology was different from existing Brahmanism ideology which didn't believe in any caste rigidity.

2) Later on, Brahmanism underwent reform under Bhakti movement and its ideas also included inclusion of all.

3) Brahmanism started to view Buddhism a part of Brahmanism only & not a separate fold.

4) Buddha was considered 8th incarnation of Lord Vishnu so, made part of Brahmanism only

It led to decline of Buddhism's idea as a separate fold.

Along with these factors, the change within Buddhism also contributed to its decline such as use of sanskrit at the place of Pali language.

Why was it more difficult to rehabilitate refugees in West Bengal as compared to Punjab after partition? (Answer in 250 words) 15

उम्मीदवारों को इस हाशिए में नहीं लिखना चाहिए
Candidates must not write on this margin

Partition took place as per the Mountbatten plan of June 1947. Boundary commission under Sir Radcliff was appointed to further the process of partition. Partition brought with huge influx of people creating challenges of rehabilitation.

Difficult in West Bengal to accomodate rehabilitation: Reasons:

1) More united by culture & language -

1) With more sense of unity in people due to common culture it was difficult to segregate & rehabilitate

2) More communal tensions - as Gandhi'ji' who visited Naokhali when partition took place to pacify the masses.

The Supreme Court of India has upheld unique asymmetry in India's federalism by intricately balancing centralized authority and regional autonomy. Discuss with the help of relevant case laws. (Answer in 150 words) 10

उम्मीदवारों को इस हाशिए में नहीं लिखना चाहिए
Candidates must not write on this margin

Asymmetric federalism refers to federal setup where power & authority is divided at more than one level but the distribution of power and authority is not equal but varies as per context & need.

Unique Asymmetry
- Rajya Sabha, representation Slab
- Special Status → J&K, N. East state
- Article 246
- Article 371 – 371J
- Article 5, 6
- Article 356, 352 → centralisation

SC upheld : case studies

1) Recent case on SC subcategorisation – SC upheld power of state government to sub-categorise SC reservation.

2) ~~Multiple~~ Multiple State Cooperative Society Act – Supreme court quashed provision undermining

power of state to legislate cooperative society within state. Thus upheld authority of state under list II of Article 246.

3) J&K Reorganisation Act case:- Here, SC upheld the authority of central government to take to state status & change to UT. Thus more centralising provision.

4) Bommai case. SC upheld federalism as basic principle and right of state to have a state flag was upheld.

5) SC on emergency provisions like- B.P. Singhal case- upheld power of centre based on factual grounds to put emergency in a state.

→ Thus, court has balanced centralized authority & regional autonomy.

As P.V. Ramana has said - Indian federalism is ~~Amphibian~~ Amphibian, it changes to central or federal as per need of time.

1. खाद्य प्रसंस्करण उद्योग का तीव्र विकास किस प्रकार भारत में खाद्य सुरक्षा संबंधी चुनौतियां उत्पन्न कर रहा है? (उत्तर 150 शब्दों में दीजिए)

How is the rapid growth of the food processing industry leading to food safety challenges in India? (Answer in 150 words) 10

उम्मीदवारों को इस हाशिये में नहीं लिखना चाहिए
Candidates must not write on this margin

Food processing industry has rapidly grown where there are more than 2 lakh enterprises in this sector. It has several advantages as-

Advantage → More export value
→ Value addition
→ high shelf life
→ More income to farmer
→ MSME growth

However it has led to food safety challenges

1) Availability of food - As FPI grows more & more of the raw material from agriculture is fed to these industries thus reducing the availability eg. Rice is being fermented to make vinegar so, Reduce Rice supply

2) Cost of staple crops increases - as it is diverted to FPI for value addition so, higher demand so, cost of staple crops increases.

VisionIAS

2) Cost of final output from FPI is high so, makes it unaffordable for some sections
→ Thus, leading to unavailability of food hence affect food safety.

3) Food safety can also be understood in terms of quality of final product from FPI –
– If final output is not upto mark for human consumption due to lack of strict quality control causes food safety issues.

Further Need is,
- Quality assurance check
- Regulation of sector
- Control any predatory practice
- Strengthen PDS system.

It is a sunrise sector with significant growth potential.

Under the Public Distribution System of India, the Fair Price Shop (FPS) transformation is an evolving process. Discuss. (Answer in 150 words) 10

उम्मीदवारों को इस हाशिए में नहीं लिखना चाहिए
Candidates must not write on this margin

Fair price shops under PDS are the node which facilitates distribution of ration and other essential items to beneficiary.

Purpose of FPS:
- Reduce poverty
- Food security
- Nutritional security
- Social Justice
- Equity
- affordable

Transformation of FPS is an evolving process

FPS has kept evolving as per need of time -

1) Commodities distribution basket has changed

- Earlier commodities like Kerosene oil, sugar was also distributed but now kerosene has been removed from FPS distribution. (LPG replaced)

VisionIAS

उम्मीदवारों को इस हाशिए में नहीं लिखना चाहिए
Candidates must not write on this margin

2) Beneficiary selection process evolved -
With ~~[illegible]~~ evolution more targeted approach was adopted to check leakages and T-PDS was launched.

3) Technological integration - Currently, PDS shop have employed ITC tools to ensure smooth distribution & check leakage

4) ONORC scheme - further led to Nationalising PDS where, an individual can avail ration from any place in India

5) More targeted approach to reach last mile - Antodaya was introduced, APL, BPL segregation has made.

Need is → Shanta Kr. Committee → Slowly reducing no. of beneficiaries from 80 crore → 60 crore
→ move to cash transfer
→ Increase the quality

PDS is an essential step in the direction to bring social justice.

How are agri-tech startups in India helping farmers in enhancing farm productivity and market access? (Answer in 150 words) 10

उम्मीदवारों को इस हाशिए में नहीं लिखना चाहिए
Candidates must not write on this margin

Agri startups employ ITC tools to help farmers in improving productivity & market access -

Farm productivity

1) By providing easier access to credit -

eg - JAI KISAN loan is an app that provide cheaper & easier access to credit.

2) By providing access to machinery & help in mechanisation -

eg - Gold farm a startup which provide access to machinery such as- thresher, tractors on ~~[illegible]~~ less price for short duration.

3) By providing weather related information & prediction - Agri startups can use

VisionIAS

उम्मीदवारों को इस हाशिए में नहीं लिखना चाहिए
Candidates must not write on this margin

satellite data & services to provide weather forecast, climate appropriateness of a crop & advice for climate & region specific cropping.

Market access

1) By providing direct link to consumers

eg. Ninjas Kart - it is startup which directly takes product from farmers & sell to consumers in urban setting.

other eg. - SAFAL

2) By providing price discovery - what is the current prices of different agricultural commodities.

Challenges with agri startups
- high failure rate ≈ 90%
- lack credit access
- Lack support systems as - incubator
- lack of awareness among farmers

With dedicated push such as Budget 23-24 provided for agritech startup accelerator fund, startups in agriculture sector can do wonders.

To fully exploit its demographic dividend and accelerate economic growth, India needs to adopt a manufacturing-led growth model. Discuss. (Answer in 150 words) 10

उम्मीदवारों को इस हाशिए में नहीं लिखना चाहिए
Candidates must not write on this margin

India currently have 64% of population in working age group (16-64). which is projected to reach 68% by 2030. thus having good opportunity to reap benefits of demographic dividend.

Need to adopt Manufacturing led Model

1) Manufacturing sector is labour intensive
This will provide youths with employment opportunity

2) Manufacturing sector contribution to GDP is less - 17% -
- by reaping benefits of demographic dividend, Manufacturing sector can be given a push → thus adding to economic growth.

3) Manufacturing sector can help expand

उम्मीदवारों को इस हाशिए में नहीं लिखना चाहिए
Candidates must not write on this margin

export basket → thus more earning from forex + economic growth.

4) More economic demand - being labour intensive → more employment → more disposable income → more demand in economy → more investment → economic growth

5) It will also give push to MSME sector which will generate more employment opportunity for ~~of~~ working age population & will also expand export.

~~Homeschool~~

However challenges → Pre-mature deindustrialisation
→ Poor skill in youth (India skill Report) (45% are employable)
→ supporting infrastructure is poor as logistics cost – 14%.

As per Lewis growth model, India must use its comparative advantage of labour availability & push manufacturing sector.

NavIC (Navigation with Indian Constellation) is a navigation system developed indigenously by ISRO.

Cover 1500 KM

Cover 5500 Km²

Component → 4 geosynchronous satellite

→ 3 geostationary satellite

→ Rubidium & Cesium atomic clocks

Need for NavIC

1) Defense security - an indigenous system make our defense capability robust such as - use of guided missile requires navigation.

2) Sovereignty - It makes India independent and not to be affected by policies of other nation

eg - USA denied India use of

VisionIAS

navigation system during Indo-Pak war.

3) Exploting services - NaVIC can be used to develop other related services such as- 3D mapping, Street view, vehicle tracking which can exported to other player.

4) Vast applications - in other sectors such as- geneic use fishing
- Jagan in air transport

5) Make India future ready - to address any kind of weaponisation of current global navigation systems such as- GPS, Glonass.

Need is → further make it global
→ improve precision
→ widescale deployment for citizens use.

'NaVIC' is certainly a development in right direction to cater our needs as well as those in our neighbourhood eg- SAARC nations can use it.

Contribution of Micro irrigation system

1) Water sustainable use. Micro irrigation system like sprinkler, drip irrigation promotes judicious use of water.

VisionIAS

उम्मीदवारों को इस हाशिए में नहीं लिखना चाहिए
Candidates must not write on this margin

2) Prevent soil degradation

Due to surface overflow of water upper layer of Humus gets depleted. Micro irrigation system prevent it.

3) Address climate insensitive practices which causes harm to soil as well as wastage of Resources.

eg - flood irrigation in which most water gets evaporated & wasted.

4) Sustainable use of ground water - micro irrigation manages produces extraction of groundwater (agriculture largest user)

5) Fertigation - microirrigation allows direct application of fertilizers & pesticides to root of crop using drip irrigation method.

9) Address the scarcity issue due to global warming as - water is used in very less quantity & doesn't go waste.

Challenges
- Lack of awareness about its importance
- Mostly depend upon Monsoon (55%)
- high initial cost of installation

To do
- Promote micro irrigation by providing credit support
- Promote under PM-Krishi Sinchai Yojana
- Promote awareness about its use & potential benefit
  - KV Kadia can be used for it

It is essential to make Indian agriculture future ready and remain productive & lucrative. As future belongs to Nations with grain Not guns

What strategies can be adopted to overcome the issues pertaining to freight transportation in the Indian Railways and increase its share in the domestic freight? (Answer in 250 words) 15

उम्मीदवारों को इस हाशिए में नहीं लिखना चाहिए
Candidates must not write on this margin

Indian Railways share in the freight is 2nd to roadways which is ~ 25-28%. Its contribution is not in commensurate with its potential -

All track not electrified

~~Strategies~~

high cost

Issues Pertaining to freight Transport

Slow speed

high delivery time

Cross subsidised with passenger fare

slow movement of rolling stock / wagons

excessive delays

Lack of multimodal integration.

Strategies that can be adopted

1) Improve the infrastructure -> such as improve the wagons with more

VisionIAS

उम्मीदवारों को इस हाशिए में नहीं लिखना चाहिए
Candidates must not write on this margin

weight carrying capacity

- Moot the development of dedicated freight corridors b/w with wider tracks & faster speeds

2) Dedicated track for movement as in DFC.

3) Avoid cross subsidisation wrt passenger fare which can lead to a situation of death spiral

4) Promote multiple modal integration of Railway - seamless transfer of freight from Road, waterways to Rail can go a long way in improving freight share.

eg. Scheme of ~~Bha~~ Bhatinda, Sagar mala

National logistics policy provides for NLIP portal for seamless integration

5) Electrification of tracks - currently only 45,000 km out of 65000 km is electrified (IRW)

→ electrification will bring cost down.

6) Private sector participation - as also was recommended by Vivek Debroy committee., Pvty participation can bring investment into infrastructure development.

7) Professional & corporate management - to improve work culture in Railways & make it more efficient.

With proper multi-modal integration & capacity enhancement railways can reap its true potential in freight movement. We can learn from successful examples like USA, China.

Candidates must not write on this margin

As per IRENA, India is 4th largest producer of Renewable energy in the world with contribution of wind and sun also 4th largest in world.

Factor responsible for making impressive strides

1) Abundance of Resources - 1) India being a tropical located nation has abundance of solar energy throughout the year

2) Also, 7500 km coast-line provides ample wind energy potential.

2) Capacity building - India has put-efforts in developing in house capacity like - 1) JNNURM mission for PV cells

2) Solar Corporation of India, PSU established

3) Policy effort – India has put dedicated policy efforts such as –

1) National solar mission

2) Nat offshore wind energy policy 2015

4) Global cooperation – India has taken global cooperation through initiatives such as – 1. International solar Alliance

2. Global biofuel Alliance

3. OSOWOG initiative.

5) Promote local manufacturing – such as PLI scheme for PV cells, & VGF for battery development (Budget 2023)

6) Increasing share in power generation – which is currently 40% of total power generation

8) Improving commitment & fulfilling them as- At UNFCCC to produce 50% of energy by 2030, previous NDC target has achieved.

Challenge → Capital requirement
→ Imported dependence (as- PV cells)
→ Skill required is not available
Climate finance not provided by Developed Nations as committed
→ Rapid energy need growth (NDC's 3 times by 2030 of 2010 level)

How does agricultural runoff containing fertilizers and pesticides contribute to environmental pollution? What measures can be taken to mitigate the impact of agricultural runoff? (Answer in 250 words) 15

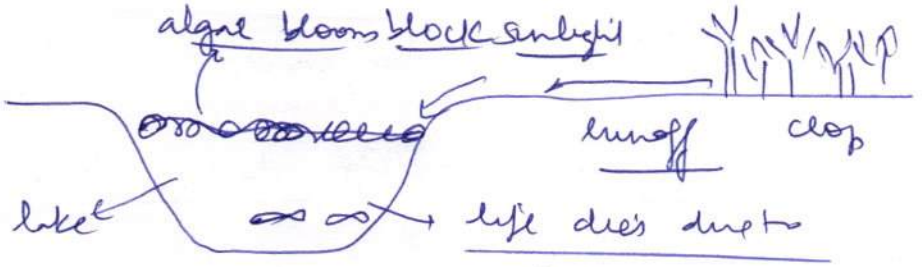
उम्मीदवारों को इस हाशिए में नहीं लिखना चाहिए
Candidates must not write on this margin

Agriculture sector employ fertilizers & pesticide on a large scale as India being the largest user of chemicals in agriculture and also largest importer.

Agricultural runoff & effect on environmental pollution

1) Eutrophication of water bodies –

Agri runoff (fertilizers & pesticides) cause algal blooms in lakes which ultimately destroy the ecosystem of lake & make it depleted of life



उम्मीदवारों को इस हाशिए में नहीं लिखना चाहिए
Candidates must not write on this margin

2) Biomagnification & bioaccumulation - it causes chemicals to amplify & accumulate in living organisms & thus harming the whole food webs & ecosystem.

3) Soil degradation - use of N:P:K = 8:4:1 at place of prescribed 4:2:1 ratio leads to soil fertility loss

4) Water pollution - / ground water pollution.
- As has been found in increased levels of phosphorus & potassium in water bodies

5) CFC emissions - these chemicals also emit harmful gases on ozone depletion.

Measures that can be taken

1) Rationalisation of use of fertilisers & pesticides
- Strict legislation to be implemented
- Sell & purchase of chemicals monitored

उम्मीदवारों को इस हाशिए में नहीं लिखना चाहिए
Candidates must not write on this margin

2) Subsidy on fertilizers to be slowly relaxed as it cause large scale use of chemicals

3) Create awareness - about judicious use of fertilisers

4) Role of Krishi Vigyan Kendra - to test soil & recommend judicious use accordingly.

5) Promoting organic farming by promoting organic pest control, manure

Ex - Zero Budget Natural farming

6) Nature based solutions - to address runoff issue eg - use of certain bacteria which feed on such chemicals.

7) Role of PRI institute - in monitoring & creating awareness.

To ensure agricultural products are safe & food & nutritional security is secured, immediate attention must be taken to sensitise & rationalise chemical use.

There has been a except upticle in the man-made disaster events in hilly regions such as landslide in Joshimath region.

Influx of tourist causing breach of carrying capacity

- Unsustainable use of Resources
- demand further infrastructure development — Roads, Hotels
- More GHG emissions
- high traffic on hilly roads
- Cause lot of waste generation
- locals exploit more Resources to sell

Measures that can be implemented while promoting sustainable tourism

VisionIAS

Superconductor are . conductor (which conduct electricity) at zero resistance. It is acheived particalarly as very low temperature as (alloy of silver). It is based on Mussheimer effect.

Fuel innovation in diverse field

1) Power sector - with carrying current at zero electricity, the loss due to heat will be eliminated so, more efficient transport of power & lower cost of maintenance.

2) Health & Medical science - Superconductors can be employed to provide better solution in disease diagnosis as well as well in developing more advanced solutions - eg. Role of superconductor

3) Electronics science & Engineering
Better electronic devices - performance of technology will improve where heating effect due to resistance can be eliminated -

as - 1. Faster & efficient Phones, laptop
2. More efficient super computers

4) In science & Research - ~~super comp.~~ superconductor can be employed in better detection & analysis of material

8) Better understand fundamental science -
By employing superconductor - a powerful magnetic sensor can be created to study magnetic interactions leptons, quarks, bosons etc

9) Space science - sensor based on superconductor are more sensitive to micro movements

Currently superconductor are limited by its use at very low temperature, need is to further push research to employ its use at room temperature.

Keeping in view the challenges in creating integrated theatre commands, examine how the theaterisation of commands can lead to greater integration and rationalisation of manpower and resources among the three services. (Answer in 250 words) 15

उम्मीदवारों को इस हाशिए में नहीं लिखना चाहिए
Candidates must not write on this margin

Integrated theatre command refers to the process of arranging the armed forced on basis of geography (theatres of war). It further brings unity in command at level of theatre.

Challenges in creating Theatre command

1) Political will is important - lack of political will is a major hurdle.

2) No pilot project to understand the overall effect.

3) Resistance from armed forces - to undergo drastic change (parochial mindset)
